## Dual-core Technology

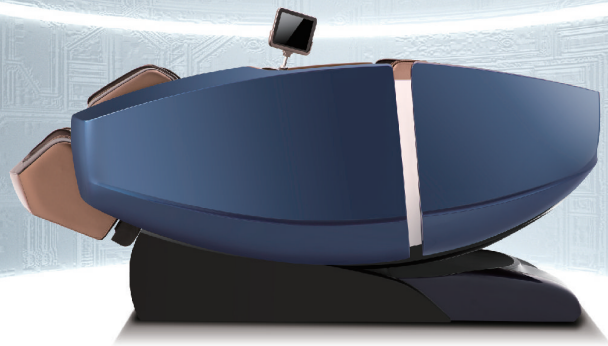

Multiple Massage Enjoyment

# Dual-core System

Synchronized massage experience

3D deep fascia massage mechanism, specialized waist&spine massage mechanism,  
Double body sensing system, innovative massage techniques provides extreme comfort

## 3D deep tissue massage mechanism

Covering 784MM, upper massage mechanism delivers pinpoint soothing massage for neck, shoulder, back and spine.

Pinpoint shoulder positioning technology  
3D deep tissue massage  
Shoulder pressing massage  
Pushing-up massage for back

## AI intelligent double sensing system

Using bipolar hall sensor technology and new developed pulse detection system for auto body figure scan

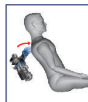

Preciser body detection  
Better signal acquisition  
Intelligent algorithm

## Specialized waist&spine massage mechanism

861MM lower massage mechanism extends further into your back, waist, hip & thigh for a deep tissue massage experience

## Elaborately designed massage programs

Uses unique Shoulder-pressing and Tuina massage technique to improve circulation which moves the blood through the congested areas of the body while the release of this same pressure causes new blood to flow into tissues. This form of therapy helps to relieve neck and shoulder pains.

# Upgraded Controls

Make it easier to control

## Armrest quick control buttons

Quick press rotary switch to toggle programs  
Rotate clockwise to increase 3D intensity (3 levels adjustable intensity)  
Rotate counterclockwise to decrease 3D intensity (3 levels adjustable intensity)

## Touch screen controller

Luxury, refinement and eye-catching  
Progress with the rapid rise of technology

## Wireless charge technology

Provides neater, quicker, and easier charging  
Put the wireless charging phone into the receptacle to charge the device when needed

## Surrounding stereo speaker

Reproduce dramatic rises and falls of the sounds, providing unique experience of excellent melody allowing music immersion via bluetooth

## Zero gravity position

More neutral postures  
More massage coverage  
Larger stretch range  
Better massage efficiency

# High End Configuration

Focus on comfort lifestyle

## Super flexible track

Top-of-the-line self-adaptive flexible track  
The track outstretches while the massage chair is reclining, mechanism travel distance increased from 1160mm to 1210mm, delivering three dimensional massage along neck, shoulder, the entire length of the spine, and all the way down to hips and thighs, greatly enhancing massage efficiency.

## Graphene ultrafast heat up

RT8900 is incorporated with enhanced thermal property  
Graphene heat system to increase blood circulation and help to soften hard muscles.

## All together 74 layers airbags

Full coverage of shoulder, back, arm, waist, knee, leg and foot by using pushing, pulling, squeezing and pressing massage techniques of rollers, airbags and heat therapy, air pressure massage can help to increase blood flow

## One press control sliding wall hugger design

5cm wall-clearance to save space

## Bi-direction stretch patented footrest

It stretches and lengthens out the deep side of our leg's muscle, joint, ligament and tendon, treats us with ultimate physical and mental relaxation.  
Upper footrest bi-direction stretch by 70mm  
Lower footrest bi-direction stretch by 150mm
